Labelling Systems

Shipping Label Kit

The kit produces an A6 format label containing information for the delivery and installation of door and window frames. The kit includes a labeller and software.

Piece Label Kit

The kit produces a label for each piece on a roll, sorting them by “profile code” and following the order of the optimised cutting list. The kit includes a labeller and software.

CE and identification label kit

The kit produces a weather-proof plastic label with the CE marking data and the identification code of the frame. The kit includes a labeller and software.

Portal www.serramentice.it

Access the portal www.serramentice.it and enter the identification code of the frame to download the relevant CE documentation. By scanning the QR code with a smart-phone or tablet you can go directly to the aforementioned documentation.
